RE: Strathmore and Joffrey work

Dear Cliff,

Great job! You all have really moved quickly on all items from contracting and insurance through material procurement and execution of the work. Always remember, no matter what, keep it safe.

Taking a few days off because of the heat it probably wise and we will certainly be satisfied with the schedule. Please see that invoices are processed as quickly as possible and sent to me in Houston.

In addition to all of this, don't forget that the client had voiced an opinion of having some additional work they wanted done outside of our contract. This is something that you would execute directly with Ferus Gas. It included painting the cold box, as well as, a lot of touch up work. Please address this with Ross Houston or even Jim MacKinnon.

Thanks again.
