January 15, 2001

Mr. Mark Paulson Kootenay  
Powder Coatings Ltd., S12, C-13,  
RR1 Castlegar, B.C.,  
V1N-3H7

To whom it may concern:

Pacific Insight completed the construction of our new 70,000 square foot electronics manufacturing facility in December 2000.

Kootenay Powder Coatings (KPC) were the successful bid on the project and completed the entire project both on time and on budget in the month of December, allowing the Company to be fully operational by January 2, 2001.

Mark Paulson and his team of painters performed an excellent job in respect to quality, service and price. I would have no reservations in recommending KPC for any project they should wish to bid on.

Sincerely,  
PACIFIC INSIGHT ELECTRONICS CORP.,
