Kootenay Powder Coatings Ltd.  
RR#1S12C13  
1840 Co-op Lane  
Castlegar, B.C.

Attention: Cliff Harper  
RE: Arrow Lakes Generating Station

Dear Mr. Harper:

As our project winds down we would like to thank the crews from Kootenay Powder Coating for their performance on this complex project.

While having to meet B.C. Hydro standards, the Kootenay Powder Coating crew have managed to complete the work while working in a neat and orderly fashion. They have adhered to all appropriate safety standards whether 100 feet up on a swingstage or crawling into confined spaces. Their combination of experience and innovative thinking quickly resolved any problematic or challenging situations. They were thoughtful of other trades, working skilfully to minimize their impact and obtrusiveness. In short a good crew, well led, that did good work.

Our management worked closely with your crews to meet the demands of the moment and unexpected material needs were satisfied in a timely fashion by your suppliers.

Kootenay Powder Coating did an excellent job and we look forward to working with them in the future.

Sincerely,

Greg Dixon, P. Eng.  
Project Manager
