

Letter of recommendation: KPC Coatings Ltd.

Feb. 18, 2008

To whom it may concern:

KPC Coatings painted seven bridge piers for Spectra Energy during September 2007 in the Pine Pass area, some 70 km west of Chetwynd, BC. We were pleased with the performance of KPC Coatings. Although the start date was delayed by two weeks, the painting was completed on time and without any safety or environmental incidents. In view of the challenges in accessing the piers and the inclement weather, KPC performed the work very well. I was impressed with their knowledge and expertise in painting and the equipment they used to carry out the work efficiently. I would not hesitate to recommend KPC Coatings for further work.

A handwritten signature in black ink, appearing to read "John Cripps". The signature is fluid and stylized, with a long horizontal stroke extending to the right.
