

## Certified Coating Specialists Inc.

*Professionalism in painting, safety, environmental stewardship – realizable value*

# Bridge Works – A Challenge and an Achievement

CCS IS  
SSPC-QP1  
CERTIFIED

As an SSPC-QP1 Certified Coatings Applicator for Complex Structures, one of only five in Canada, **Certified Coating Specialists Inc.** meets the primary tender qualification of both the Provincial and Federal Transportation Ministries for the painting of bridges. To further support bridge rehabilitations, **CCS** has three management team members that have been certified as lead abatement Supervisors as well as three members that are NACE certified and two certified CSO's. All work crew members receive extensive safety training associated with elevated bridge work. In addition, **CCS** has assembled a comprehensive lead abatement manual covering all applicable Provincial and Federal Regulations. This manual is available to **CCS** customers.

In 2006, **CCS** was awarded by Public Works and Government Services Canada (PWGSC), the lead abatement, surface preparation and four coat paint application contract for reconditioning the federally owned **LIARD RIVER BRIDGE**; the last **SUSPENSION BRIDGE** on the Alaska Highway. Project completion required two seasons. Completion was achieved without any safety or environmental issues. Both the PWGSC Project Manager and coating system inspector congratulated CCS on a job well done. (Contact names available upon request.)

Liard Bridge - Liard Hot Springs.

Liard Bridge - Sail Tarp containment to allow for the capture of blast media, paint overspray and the ability to control the work area environment.

When you contract **Certified Coating Specialists Inc.** for your bridge project, you are retaining the best team in the Industrial Coating Industry in BC and, arguably in western Canada, today. To support this claim **CCS** is the only industrial coating contractor we are aware of in the country, that carries Environmental Insurance to protect our company and you. At **CCS** we believe when you state something you had best back it up with appropriate action.

*Cost effective delivery of services mitigating risk and ensuring realizable value for our customers.*

At **CCS** we strive at all times to meet or exceed customer expectations. **CCS** has the ability to simply and effectively power wash and over coat your bridge. We have the ability to deploy Ultra High Pressure Water Jetting as a surface preparation technology which can deliver a coating life span of 12-15 years at a price far less than abrasive blasting. **CCS** has the skill set and equipment to meet any form of abrasive blast specification to deliver a 20-25 year coating life expectation.

Additional bridge coating related services, is the ability to work efficiently with customers to develop comprehensive lead abatement, environmental stewardship, quality control and safe work programs specific to any contract. **CCS** has the proven in house ability to provide scaffold and shrink wrap containment.

**CCS** often works with general contractors to support their efforts for small scale lead abatement and spot coating.

**Mainroad Services  
Lions Gate Bridge–  
Expansion joint  
metalizing and  
application of  
protective coating  
executed on  
midnight shift.**

Bridge coating is one of the most challenging contracts of our business they also provide genuine satisfaction to all who work on it. **CCS** thrives on these projects and welcomes each challenge with enthusiasm and commitment.
